

We need *your help* in our important work transforming drug and alcohol services for trans and non-binary people!

Why? There is extremely little research exists in this area on our community. We know from experience that people from the trans and non-binary community often struggle to find support, and their needs can sometimes differ from LGBTQI+ as a whole.

This research will help us shape our organisation and services to ensure we offer the best possible support to the community.

It will also inform our work with larger established mainstream support organisations to help them understand the unique needs of trans and non-binary people, the impact this can have on their drug & alcohol use, and the barriers to accessing their services.

Please share this survey with anyone you know from the trans and non-binary community. It will close on the 22nd September.

Scan the QR code to start the anonymous survey on your device.

Email us to be entered into a £50 Amazon voucher prize draw.
