

COVID-19 VACCINATION

Healthwatch website

We have created a dedicated webpage on the [Healthwatch Brighton and Hove website](#). Information is being released all the time and we are regularly updating this dedicated page as more information about the roll-out of vaccines is released. The website explains how the vaccines are currently being rolled-out and includes news and updates. In this bulletin we have included some of the most significant changes announced over the last week below.

Please visit the Healthwatch website [here](#) for more information.

Contact us

Healthwatch is working with local NHS Clinical Commissioning Groups to ensure you get the information you need. If you have a specific question, please do get in touch at office@healthwatchbrightonandhove.co.uk

Information to help you understand the vaccination roll out

You can access some answers to Frequently Asked Questions about the vaccine by clicking [here](#).

To help you understand more about the vaccination roll out and what to expect, a series of videos have been produced which are available below:

How will I get my jab? (animation) <https://www.youtube.com/watch?v=Bh4DLdKD6uw>

I have received a letter, what do I do? (animation)
<https://www.youtube.com/watch?v=ame-eJ4RUSU>

How will I be invited? <https://www.youtube.com/watch?v=wtDEiOK46GM>

What is a vaccination centre? <https://www.youtube.com/watch?v=izprZWWYe9w>

A. Positive feedback, and how your feedback is helping others

We have received more positive feedback about the vaccination service at the Brighton racecourse which we wanted to share with you.

“

The whole experience was so positive, the volunteers outside in the rain so friendly cheerful and helpful, volunteers inside greeting us, asking all the appropriate questions and making just the right approach to put one at ease. The people managing the paperwork, directing on to next area where the vaccinations took place. Again, we were put at ease and the jab completed with absolutely no fuss or pain. In this bright and airy venue, we felt very safe and cared for and any anxiety soothed. Oh, I forgot to mention the extremely helpful phone conversation with the person who was dealing with the enquires and appointment bookings. Well done everyone concerned and a sincere thank you.

”

Since the vaccine roll out was first announced, you have been asking us questions and providing us with feedback. We wanted to let you know what we have been doing with this, and how it has been helping.

Healthwatch works closely with the team responsible for the vaccination programme. They have been sharing information with us as it has become available and we have been adding this to our [dedicated webpage](#). They also produce [daily updates](#) which provide further information on the roll out. We have also been raising your concerns and questions with them, and the team has responded to these. They have produced more information and clarification as a result. The team in charge are actively listening to your feedback - and would welcome more from you so do please get in touch.

Recently, you told us

- **You asked us about a survey which appeared to allow key workers to join a waiting list. You asked if this was genuine.** We checked, and were told that this was genuine, but was not about joining a reserve list. The team in charge clarified the purpose of the survey which was to gather information on key workers across Sussex. We shared this advice with you.
- **You told us about an issue at the Brighton Centre.** Some people who were trying to book an appointment at the Brighton Centre were being asked to book their second appointment at the same time but were being offered a choice of locations for their second jab which were far away. The team in charge investigated and identified an administrative error which has been corrected. An update on this is provided below.
- **You asked us about texts you had received asking you to book an appointment, and whether these were genuine.** We investigated and with the help of the team in charge were again able to confirm that a text from 'NHSVaccBook' is a genuine message sent by the Brighton racecourse. The team in charge have fed back that it would be helpful to have information in the text to support its authenticity.
- **You asked us what the situation was for unpaid carers.** We asked those in charge who confirmed that they are included in priority group 6. Further information about carers is provided below.
- **You asked us when people who were housebound would be contacted about their vaccinations.** Once again, we liaised with the team in charge who were able to explain that roving vaccine services are now contacting individuals. The roving team have been focussed on visiting care homes and vaccinating residents, but now that all care homes have been offered the vaccine, the team are able to go out to those who are housebound in our community.

(B) Warning over COVID scams

A reminder to be on your guard against fraudulent text and email messages as new scams are being sent to patients.

Some people are receiving a text or email notification of their 'vaccination appointment' and are being asked to confirm it by clicking on a link. This looks very similar to the genuine texts being sent to patients to arrange their appointments at the GP led vaccination services.

Please follow the advice below.

- The COVID-19 vaccination is **ONLY** available from the NHS and it is **FREE** - you will never be asked to pay for it or give your bank details.
- If you receive a call you believe to be fraudulent, hang up.

- If you receive a text or email that you believe to be fraudulent please delete it. Please be assured that if you do not respond because you are worried and it is a genuine text or email, you will remain on the vaccination list and be contacted again.
- If you believe you have been the victim of fraud or identity theft you should report this directly to [Action Fraud](#) on 0300 123 2040. Where the victim is vulnerable, report it to Sussex Police [online](#) or by calling 101.

Guidance on official NHS texts

An official NHS text message from your GP practice or the organisation arranging the appointments for your GP practice such as the local GP Federation will include their details such as the name of the Practice, group of Practices or the name of the Federation working on their behalf. It may also include details of the vaccination centre. Scam text messages and emails usually do not include this information.

An official NHS text message from the national booking system will be a reminder text so will include details of your booked appointment include date, time, and location.

If you have any further concerns about something you have received please contact the Sussex COVID-19 vaccination programme team on sxccg.vaccineenquiries@nhs.net

Book an appointment using the NHS e-Referral Service - NHSVaccination

(C) Information for people who have been recently vaccinated

The COVID-19 vaccination will reduce the chance of you getting the COVID-19 disease. **It may take a week or two** for your body to build up some protection from the first dose of vaccine.

Although you should get good protection from the first dose, having the second dose should give you **longer lasting protection** against the virus.

Like all medicines, no vaccine is completely effective - some people may still get COVID-19 despite having a vaccination, but this should be less severe.

The vaccine cannot give you the COVID-19 infection, and 2 doses will reduce your chance of becoming seriously ill.

We do not yet know whether it will stop you from catching and passing on the virus. So, it is important to follow the guidance in your local area to protect those around you. To **protect** yourself and your family, friends, and colleagues you still need to practice social distancing, wear a face mask, wash your hands carefully and frequently, and follow the [current guidance](#).

(D) Supporting our BAME communities

Sussex-based comedian Romesh Ranganathan is among several celebrities who have joined forces in a powerful video seeking to counter coronavirus vaccine misinformation among ethnic minority communities.

In Sussex, plans are underway to provide tailored information and support for all our communities, including those who traditionally experience health inequalities - including localised videos. Materials are being provided in a range of alternative languages and formats and we are working with community groups and community leaders. In addition, over 80 vaccination champions - all from a wide range of diverse backgrounds and geographies - are being trained to support people in their local communities, answering common questions and signposting further information.

[Translated COVID-19 materials](#)

Please see the end of this bulletin for information in a variety of languages about how to book an appointment online if you have been invited to do so.

(E) Two new COVID-19 vaccination centres open for people in Sussex

Residents in Sussex can now receive their COVID-19 immunisations at two new vaccination centres, which have opened in Crawley and Eastbourne.

Sussex Community NHS Foundation Trust has opened facilities at Crawley Hospital in West Green Drive and The Welcome Building in Compton Street, Eastbourne. The services are by appointment only with vaccinations delivered by teams from Sussex Community NHS Foundation Trust (SCFT). Residents who are eligible for a vaccination, and who live within a 60-mile radius of one of vaccination centres, are being written to directly by the NHS and invited to book an appointment.

The new centres in Crawley and Eastbourne follow the opening of the Brighton Centre last week and are in addition to the local GP-led vaccination services that now cover all patients in Sussex and select pharmacy-led services that are also available through the national booking system.

Vaccination centres are another part of the COVID-19 vaccination programme, working alongside GP-led vaccination services, roving services, specific pharmacies, and hospital

hubs. While GPs invite their patients to get vaccinated at their local vaccination service, appointments at the vaccination centres are made through the national booking service.

The national booking service writes to eligible people, living within 60 miles of a vaccination centre, inviting them to book an appointment at the centre online or over the phone. The letter contains all the details people will need to book their appointment. Anyone receiving a letter from the national booking service can choose whether to book an appointment at the vaccination centre or wait until they are contacted by their GP for an appointment at their local vaccination service if they prefer.

Brighton Centre: booking appointments via the national booking service

Both first and second dose appointments are now available via the national booking service - either online or over the phone - at the Brighton Centre. We understand that there was an admin issue earlier this week which was preventing second dose appointments being made at the time of booking and people were being offered appointments much further away. This has now been updated and if you have received a letter from the national booking service and choose to use this route to book your appointment, you can now select the Brighton Centre for your first and second appointments.

(F) Residents living in all care homes for older people in Sussex have been offered the COVID-19 vaccine

People aged over 65 years old in care homes and those who look after them were identified as the top priority group for the COVID-19 vaccine by the Joint Committee on Vaccinations and Immunisations, due to their high risk from coronavirus. Thanks to the dedication and commitment of our vaccination teams from GP-led services and Sussex Community NHS Foundation Trust, Sussex has met the government target to vaccinate older care home residents by the end of January 2021.

A small remainder of homes in Sussex have had visits deferred for safety reasons, following a risk assessment, during local outbreaks. These homes - as well as any other residents or staff that were unwell or unable to have a vaccine at the vaccination team's initial visit - will be visited as soon as possible.

Frontline health and care staff across Sussex continue to be able to access the vaccine daily at one of our hospital hubs or vaccination centres.

Sussex NHS Commissioners Chief Nursing Officer, Allison Cannon, said: "By vaccinating thousands of older people across hundreds of care homes in Sussex we have given them not only some protection against the virus, but also a sense of hope.

In Sussex we have one of the highest numbers of nursing and care homes per capita across the country and so this work is a significant undertaking. I would like to extend my heartfelt gratitude to our vaccination teams for their ceaseless work around the clock to get this vital protection to our older people.

“We continue to vaccinate thousands of care staff every day. They have worked tirelessly to look after our most vulnerable people through some very difficult months and I want to take this opportunity to thank them for their dedication and commitment. I would urge anyone in these roles to take the vaccine if you are offered it. Those working in care homes are at much higher risk of repeated exposure to the infection. Catching COVID-19 can be serious and may lead to long term complications, but you can also have the virus without any symptoms and pass it on to family, friends and residents, many of whom may be at increased risk.”

”

(G) Health and care workforce vaccinations

In Sussex, we are on course to vaccinate the top four priority groups by mid-February, in line with the national target. This includes the 120,000 health, social care, and other care workers across the system.

The government’s ‘Green Book’ chapter on COVID-19 (from page 11) identifies the long list of health and care staff that are currently eligible for vaccination. You can see the Green Book by [clicking here](#).

[You can find out more information about which groups are eligible, and how to book an appointment](#)

(H) Vaccination reassurance for those who are housebound

Home visits for people who are eligible and considered housebound across Sussex are underway, and people are being reassured they will be contacted in the next two weeks.

The NHS is on course to offer the vaccination to the top four priority groups by the middle of this month, in line with the national target. This includes those in the priority groups who are considered housebound. This is being carried out by a ‘roving’ service, which involves NHS teams taking the vaccination to people’s place of residence to be vaccinated. This is being carried out by a combination of either the GP-led vaccination services or Sussex Community Foundation NHS Trust.

Allison Cannon, Chief Nurse for the Sussex NHS Commissioners, said: “People who are considered housebound are being contacted and vaccinated in their home. Because this involves taking the vaccine into people’s individual homes, it takes longer to vaccinate these people than it does in the GP-led vaccination services or the larger vaccination centres.

“We are aware there has been some concern from people who are housebound who have not yet been contacted, especially as they are seeing other people who are able to travel being invited to get their vaccine. We want to assure those people that you have not been forgotten about and that you will be contacted as soon as possible for your vaccination.”

”

(I) Invite letters start to be sent to those Clinically Extremely Vulnerable in Brighton and Hove

People aged 18 and over in the clinically extremely vulnerable priority group will start to receive letters from the national booking service inviting them to book a vaccination appointment. People in this priority group are those in the [Shielded Patient List](#) and includes those who are undergoing cancer treatment, people who have severe respiratory conditions and those who are at risk of severe infection due to immunodeficiency.

The letters make it clear that people have a choice of where to get vaccinated and can choose to wait for their GP led vaccination services to make contact directly, if they have not already, or book into a vaccination centre or community pharmacy via the national website or phone number.

If people in the eligible groups want to receive the vaccination at your GP led vaccination service, you do not need to do anything; you will remain on the list for the GP led vaccination service and they will contact you as soon as an appointment is available. You will only come off the list and not be contacted by your GP led service if you receive your vaccination.

Please do not call your GP practice or any local venues which are being used for the vaccination service on specific days; you will be contacted directly in the next two weeks.

[Guidance on shielding and protecting people who are clinically extremely vulnerable from COVID-19](#)

(J) Carers and their vaccinations

The Carers Centre have published a joint communication with Care for the Carers, Carers Support West Sussex, and Amaze, providing carers with information about the COVID-19 vaccination rollout.

To access this comprehensive guide please [click here](#)

(K) Updated questions and answers

A full FAQ is available here:

<https://www.sussexhealthandcare.uk/keepsussexsafe/sussexcovid-19-vaccination-programme/faqs-about-the-covid-19-vaccine/>

I have been sent a letter inviting me to book my vaccination - what do I need to do?

We are aware that patients are starting to receive letters from the national vaccination booking system. The letter is labelled only from the NHS and invites you to book your vaccination appointment.

We recognise that these letters are causing confusion and we want to provide a simple summary of how people can receive their vaccination and the purpose of these letters.

In our area, people in the eligible groups can receive their vaccination at either a GP-led or local vaccination service, a larger vaccination centre such as the Brighton Centre which went live this week, a local pharmacy service, or a roving service which is visiting care homes and those who are housebound.

All these services are working alongside each other and provide people with choice to decide where they would like to receive their vaccination.

GP led or local vaccination services are contacting patients directly by phone, text, or letter to book an appointment. People will also be contacted directly if they are housebound and not able to access a service.

Appointments at the larger vaccination centres and local pharmacy services are available through a national booking system and the letters set out how you can access this - both through a website and a phone line. The letters are being sent to anyone in the eligible priority groups who live in a 60-mile radius from a vaccination centre or a local pharmacy service. It is important to say that this is not just in Sussex and if you live in proximity to a vaccination centre or pharmacy in Hampshire, Kent, or Surrey, you are able to book for these and have your vaccination there.

If you have received a letter, you can either use the national booking system to arrange an appointment at a large vaccination centre or pharmacy, or you can leave the letter and you will continue to be contacted by your GP led or local vaccination service (supported by your GP practice) to arrange an appointment.

(L) Latest vaccination data published

As a city we remain on course to vaccinate the top four priority groups by mid-February, in line with the national target. [See the full latest data on the NHS England website](#)

In the latest data up to 31st January 2021 in Sussex

- Over 288,000 doses of the COVID-19 vaccination have been delivered.
- 86% of over 80s had received their first dose. This equates to over 96,000 people which is the fifth highest total in England and all the more impressive in the context that Sussex has one of the highest over 80s populations in the country.
- 78% of the 75-79 population, and 23% of those aged 70-74 had also received their first dose.
- In addition, over 100,000 people under the age of 70 have been vaccinated, predominantly eligible health and social care workers.

Our current position is:

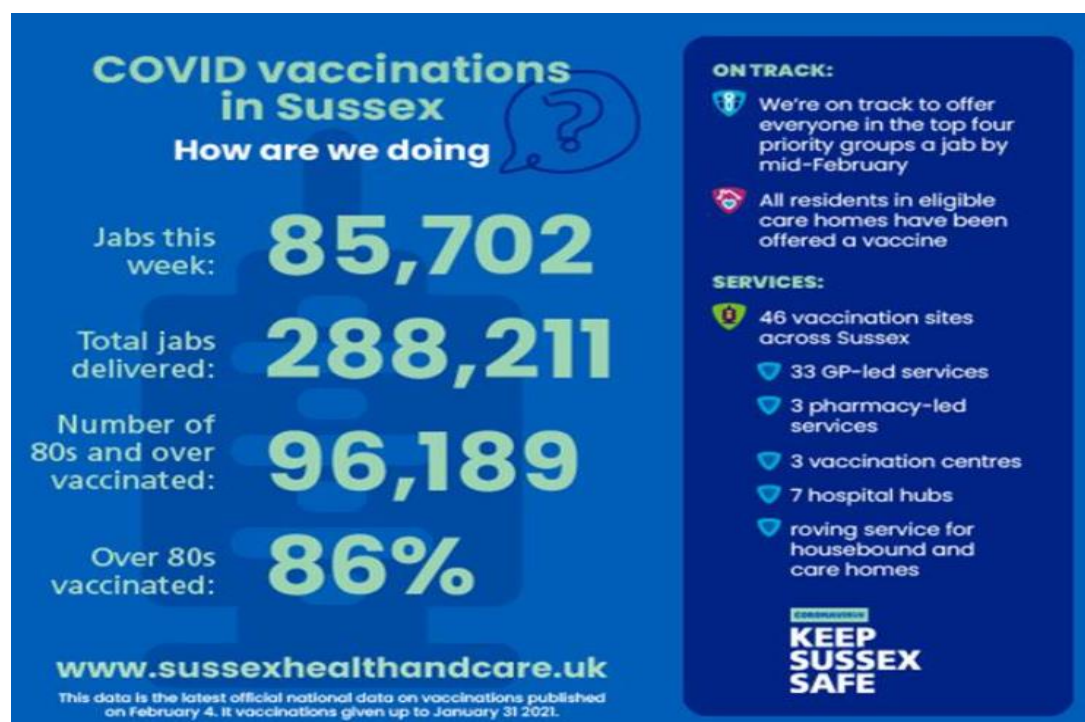

Priority 1 - Residents and staff in a care home for older adults - all older peoples care homes have received first dose vaccinations apart from a small remainder of homes who have been deferred due to an outbreak. Vaccinations for these homes have been scheduled.

Priority 2 - Frontline Health and social care workers and aged 80+. Front line NHS staff have received first dose vaccination and we are working to ensure that remaining social care staff vaccinations are completed by February 15th. The

majority of people aged 80 and over have been vaccinated, with the remainder expected in the next two weeks.

Priority 3 - Aged 75-79. - 78% of those aged 75-79 have received the first dose vaccination in Brighton and Hove. The remainder of people in this group are expected to be vaccinated by February 15th.

Priority 4 - Aged 70-74 and Clinically extremely vulnerable individuals - 23% of those aged 70-74 have received the first dose vaccination and the remainder of people in this group are expected to be vaccinated by February 15th. We have identified those who are clinically extremely vulnerable and are actively working to ensure that people in this group are vaccinated as early as possible.

National news on the vaccine

New vaccines: Janssen and Valneva

Janssen

[Janssen publishes positive safety and efficacy data for single-dose COVID-19 vaccine](#)

Janssen today (29 January) published positive data from the phase 3 studies of its single-dose COVID-19 vaccine candidate, showing it to be 66% effective overall in preventing coronavirus in participants. The data did not report any significant safety concerns relating to the vaccine, with no serious adverse events in vaccine recipients.

The UK has secured 30 million doses of Janssen's vaccine last summer, with deliveries expected to arrive in the second half of this year if approved for use by the Medicines and Healthcare products Regulatory Agency (MHRA), who will review and analyse the relevant data to see if the vaccine meets their strict standards of safety and effectiveness.

Valneva

UK government has secured an additional 40 million doses of Valneva vaccine.

- Deal means the UK has now secured early access to over 400 million total doses of vaccines for 2021 and 2022
- 100 million doses of Valneva vaccine have now been secured
- UK Government boosts Scotland vaccine production powerhouse at Valneva's site in West Lothian, supporting 100 highly skilled jobs

The UK Government has today (Monday 1 February) signed a deal for a further 40 million doses of Valneva's promising vaccine candidate.

The latest deal will bolster long-term vaccine production in Scotland and brings the total UK vaccine portfolio to 407 million doses over the next two years.

Vaccinations hit 10 million mark

Figures show the NHS vaccinated a total of 10,021,471 million people between 8 December 2020 and 2 February 2021, including

- 9 in 10 of those aged 75 and over in England have received their first dose
- vaccines offered to all elderly care home residents and staff in England and Wales.

[More than 10 million people receive first dose of COVID-19 vaccine in UK](#)

Study will examine whether different vaccines can safely be used

Patients taking part in a new clinical study launching will soon receive different COVID-19 vaccines for their first or second dose.

Backed by £7 million of government funding, the study will be the first in the world to determine the effects of using different vaccines for the first and second dose - for example, using Oxford University/AstraZeneca's vaccine for the first dose, followed by Pfizer/BioNTech's vaccine for the second.

The current programme of 2 doses of the same vaccine over 12 weeks remains in place.
